Abstract:

This session will provide an opportunity to discuss the practice, design, and process used to create meaningful and impactful digital stories for a newly developed and required course focused on the topic of sustainability. The session aims to be both process-driven and reflective with the goal of articulating specific steps that went into creating digital stories. While the presenters acknowledge that there are many ways to create and develop digital stories, we suggest this as a successful process worth reviewing, discussing, and replicating.
