

Arizona Aerospace Supply Chain Study: Helping Arizona Companies Innovate and Compete via Global Partnerships

*Gary Waissi*

*College of Technology and Innovation, Arizona State University*

We will present an overview of an ongoing supply chain research project of Arizona based aerospace tier 1, 2 and 3 suppliers. This project consists of identifying and surveying all Arizona based aerospace suppliers with respect to their utilization of lean six sigma, lean enterprise, and next generation manufacturing concepts. The goals include: 1. establish a baseline; 2. help those companies advance process- and product innovation in their organizations. 3. Establish global partnerships.
