

## **Partnership Proposal**

### **Advanced Radiation Therapy Cancer Treatment**

**Offer: Cancer Treatment with the best Radiation Therapy Technologies available in the US**

**Request: Seeking partners in Russia**

Arizona Oncology Services is a full service radiation oncology practice established in 1981. Our physicians provide the most comprehensive innovative therapies in radiation treatment, including Intensity Modulated Radiation Therapy (IMRT) and Image Guided Radiation Therapy (IGRT), High-Dose Rate (HDR) Brachytherapy, Stereotactic Body Radiation Therapy (SBRT), stereotactic radiosurgery for brain tumors, Gamma Knife, CyberKnife, and various types of accelerated breast therapy, prostate brachytherapy, and breast brachytherapy. Through the not-for-profit AOS Foundation, we also give our patients access to the latest national clinical trials.

Arizona Oncology Services provides Radiation Oncology Services at six locations in the greater Phoenix area. Our facilities include five owned and operated by Arizona Oncology Services and the Radiation Oncology Department in St. Joseph's Hospital & Medical Center.

We are looking for collaboration with oncology centers and other health care organizations or private companies in Russia. We offer cancer treatment at Arizona Oncology Services cancer centers for patients from Russia and other former USSR republics where radiation therapy treatment options are limited.
